Plus other third-party verified documentation, provided by the supplier, showing there are no synthetic or hazardous fertilizers or pesticides used and that crops are grown according to national organic standards.

**A minimum of one of the above must be in place and current for a stamp to be displayed on the supplier landing, profile, and material pages.*

Suppliers earn stamps based on self-reported third-party certifications, verifications, memberships, standards and/or practices. Sustainability Stamps are for sourcing purposes only. Material Exchange is not responsible for the accuracy and/or validity of supplier-disclosed information on our platform.

Accuracy and/or validity of certifications, verifications, memberships, standards and/or practices of suppliers can be checked in a third-party database.
